	Masters and Ladies Cycling Club Draaifontein Road Patrol Duty	Document Date: August 2007
		Review Date: July 2008
		Document Status: Approved

Report to the Race Organiser at the Trailer at the race venue 30 minutes before the start. You must have your cellphone with you, charged and on. Please make sure you have enough time to complete your duty properly, and sufficient petrol in your car to drive up and down Draaifontein Road several times.

Equipment to be used from the trailer

- Orange safety bib
- Red flag

Remember to return these items to the trailer before you go home

What to do at duty point

- When you travel out to your duty point, travel along the race route and look out for any dangers / pot holes / glass along the route. Clear if possible or notify race organiser so that riders can be warned before the start of the race.
- Your main duty is to provide visibility and security to cyclists riding along Draaifontein Road near the shops and shebeen. This duty is of critical importance especially to our lady riders and cyclists that are at the back of the race who may be riding alone.
- Do not intimidate or interfere with people who are normally walking or gathering along the road in this area. We need them to be "cyclist friendly" and any antagonism will only make the situation along this section worse.
- Be visible to the pedestrians and our cyclists.
- You can remain stationary at one point but travelling up and down this section, especially when lone riders come past is advisable.
- **Remain at your duty point until the last cyclist has passed.** The race organiser will inform you who that is or the pick-up vehicle will inform you when you can leave.
- Report any incidents or events to the race organiser

EMERGENCY CELL PHONE WITH RACE ORGANISER
076 570 4636

Marshalling– What signals to use to direct vehicle
Your Primary duty is to control and direct vehicle traffic. You do not have to indicate the route to the cyclists. It is each cyclists responsibility to know the route.

Marshalling– Where to place “Beware of Cyclists”
Place the signs on the road that joins into the route that the cyclists ride. Do not place on the road that is in the same direction as the cyclist route.
